PROFILE

Third-year Applied Computer Science student at Odisee (Brussels), specializing in Cybersecurity, Digital Consulting and Systems Administration. Trilingual (FR/NL/EN), I have built several full-stack projects combining web development, applied AI and virtualized infrastructure. Rigorous and self-driven, I am seeking a February-May 2027 internship to apply my technical skills within an IT team.

AREAS OF EXPERTISE

Cybersecurity: Access security and authentication (Bearer tokens), secure handling of secrets and API keys, Active Directory/DNS hardening, basic risk analysis and network security best practices.

Digital Consulting: Business needs analysis and translation into technical solutions, Business Model Canvas, SWOT/TOWS/DESTEP analysis, competitive analysis, technical communication to non-technical audiences.

Systems Administration: Windows Server & Active Directory administration, VMware ESXi/vCenter virtualization, shared iSCSI storage, live migration (vMotion), DNS management and network infrastructure.

TECHNICAL SKILLS

Programming Languages: JavaScript, TypeScript (basics), C#, SQL, HTML/CSS

Frameworks & Libraries: React, Node.js, Express.js, Vite

Databases: MySQL, SQL Server, phpMyAdmin

Systems & Networking: Windows, Linux, Active Directory, DNS, VMware ESXi/vCenter, iSCSI

DevOps & Tools: Docker, Docker Compose, Git / GitHub, command line

AI & APIs: LLM integration (Groq API), prompt engineering, REST APIs

Office Software: Word, PowerPoint

ACADEMIC PROJECTS

MirrorHire | *AI-powered job interview simulator*

- Full web application enabling users to practice job interviews with an AI recruiter, featuring automated scoring across 4 axes (communication, expertise, motivation, stress management) and a trilingual interface.

Stack: Node.js, Express.js, Groq API (LLaMA 3.3 70B), REST API

PingFin (Bankius) | *Interbank payment processing banking platform*

- Full-stack application simulating a complete interbank payment system (Originating Bank -> Clearing Bank -> Beneficiary Bank flow), with a layered backend architecture (Repository / Services) and a React dashboard.

Stack: React, Vite, Node.js, Express.js, MySQL, Docker Compose

VMware vSphere Infrastructure | *Virtualized environment with live migration (vMotion)*

- Design of a virtualized enterprise infrastructure: two nested ESXi hosts, vCenter Server, Active Directory domain, shared iSCSI storage, with a live VM migration demonstration performed without service interruption.

Stack: VMware ESXi, vCenter, Active Directory, DNS, iSCSI, Windows Server

PROFESSIONAL EXPERIENCE

Collector (student job) | *bpost Collect, Vilvoorde* | 07/2026 - 08/2026

- Daily collection of parcels and mail from businesses and bpost points of sale along a fixed route
- Strict adherence to deadlines and logistics procedures in a fast-paced environment

Cleaning Staff (student job) | *ISS - Belgian Senate* | 06/2025

- Teamwork in a demanding institutional environment, maintaining over 20 offices per day

IT Intern | *Wemmel Town Hall* | 01/2024 - 02/2024

- First-line IT support and user assistance
- Installation and configuration of workstations
- Management of user requests (basic tickets)

Sales Assistant (student job) | *Colruyt, Laeken* | 09/2022 - 11/2022

- Customer service, shelf stocking and inventory management in a retail environment

EDUCATION

Bachelor in Applied Computer Science - Specializations: Cybersecurity, Digital Consulting, Systems Administration | *Odisee, Brussels* | since 09/2024 (3rd year)

Secondary Education - IT Track | *Institut Regina Pacis, Laeken* | 09/2017 - 06/2024

LANGUAGES

French: native | Dutch: advanced | English: good working knowledge
